

SAMRA YOUNAS

AI Engineer

Multan, Punjab, Pakistan | [+92 314 6192007](tel:+923146192007) | samrayounas334@gmail.com

LinkedIn: [linkedin.com/in/samra-younas-ai](https://www.linkedin.com/in/samra-younas-ai) | GitHub: github.com/samra-younas

PROFESSIONAL SUMMARY

AI Engineer with 1+ year of production experience in Healthcare AI, Agentic Systems, and NLP. Built and deployed clinical automation tools, multi-agent scrapers, RAG chatbots, and computer vision applications. Proven ability to integrate LLMs into real-world workflows using Python, LangChain, and cloud APIs.

TECHNICAL SKILLS

AI & ML: Deep Learning, Machine Learning, Computer Vision, NLP, CNN, ANN, RNN, Regression, Decision Trees, Transfer Learning, RAG, AI Agents, Agentic AI, LLM Integration, Hyperparameter Tuning, Cross-Validation, Model Optimization, Ensemble Methods

Frameworks: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, LangChain, YOLO, Hugging Face

Development: Python, Flask, Django, REST API, Docker, Git, ML Pipeline, n8n, Zapier

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: Microsoft Azure AI, Epic FHIR API, Playwright, Speech Recognition, OCR

Web: JavaScript, HTML5, CSS3

PROFESSIONAL EXPERIENCE

AI Engineer 3rd Eye Software, Multan | May 2025 – Present

- Built Clinical AutomationAgent using NLP and speech recognition, reducing documentation time by 30%
- Developed Doctor-Patient Report Generator using LLaMA/Grok API and LangGraph for automated medical report generation
- Built Medical Voice Translator using Claude API and GPT for real-time speech translation between doctor and patient across multiple languages
- Developed RAG Chatbot using company knowledge base with NER and LLM fallback for unanswered queries
- Built Multi-Agent Deals Scraper using Playwright, Claude API, and RSS — auto-fetches, scores, and publishes deals

- Built Allergen Detection System using OCR and computer vision to analyze menu images for user-specific allergens
- Developed Book Discovery AI Agent with cover image recognition and LLM integration
- Integrated Epic FHIR Sandbox API for patient data fetch and update using Python
- Developed AI agents for workflow automation using n8n and Zapier with LLM orchestration
- Built and optimized ML models (CNN, ANN, Decision Tree, Regression) achieving 91% accuracy through hyperparameter tuning, cross-validation, and ensemble methods using TensorFlow and Scikit-learn

Technologies: Python, TensorFlow, LangChain, Flask, OpenCV, Claude API, Groq, LLaMA, FHIR, Docker, Playwright, n8n

Python Development Intern

Enigmatix Software House, Bahawalpur | Jan 2025 – May 2025

- Improved backend performance by 30% through database optimization and refactoring
- Built RESTful APIs with JWT authentication and ML classification using Scikit-learn
- Developed e-commerce features including cart management and secure payment integration

Technologies: Python, Django, JavaScript, MySQL, Git, Scikit-learn

EDUCATION

Bachelor of Science in Computer Science The Islamia University of Bahawalpur | 2020 – 2024 | CGPA: 3.73/4.0

CERTIFICATIONS

- Google AI Essentials - Coursera
- Microsoft Azure AI & ML - 3 Month Program
- Machine Learning - Coursera
